BRIEF ABSTRACT OF LETTER

Requests that Mr. H. Range Gowde Chemist D.T.L. who is in charge of manufacturing Cream of Tartar in the May be paid an allowance of Rs 25/- p.m in addition to his present pay of Rs 60/- p.m for reasons explained from 1-7-1943

NOTES AND ORDERS.

1) Lhd for perusal and orders with respect to May be sanctioned, with Dr. Conner 3/1/44. Subject to his condition at A' in P.O. 2) B.O. of Secy and Res. for a note. 4.1.44

Recd on
4/1/44

3) The investigations in the manufacture of cream of Tartar was taken up at the D.T. Laboratory in November 1941 as per the decision of the Board of G.P. & Dr. Paradargassyan who had projected & worked out the Scheme was associated with this work at the D.T. Lab. The trials having proved

Successful, the Basic Commercial manufacture of this was taken up at S.T.L. during 1942-43 & Dr. V. Iyengar continued to do this work on certain terms as indicated in Govt. dated 12/12/42 & 28/1/43. This manufacture is a highly specialised process projected & worked out by Dr. Iyengar, for which he says he has a Patent also. This work has been of a promising nature, yielding some profits. ~~also~~ The Board of D.F. ^{was of the opinion} also ~~decided~~ that this ^{work} might be taken up & continued in the S.T.L. as a routine activity. In Nov. 1943 Dr. Iyengar approached the Board ^{saying} that the remuneration due to him for the work done during 41-2 & 42-3 has not yet been paid and also requested early decision for the continuance of the work during 43-44. Since no specific proposals had been received from the Govt. Secy, in his behalf he was requested on 16/12 to expedite his proposals & also to arrange to settle the remuneration due to Dr. V. Iyengar, which he was urging. No specific report has been received so far. Meanwhile, Dr. V. Iyengar has also brought to the notice of the Board that the process projected & worked out by him was being continued to be utilised by the S.T.L. during 43-44, without his services & even without giving him anything in return for the process. The subject has been included in the agenda as per order. ~~Further~~ The Govt. Secy has now stated in his latest letter of 16/12/43

V.K.S.

Manufacture of cream & tartar - Allowance to
 Mr. Rangaswami Chettur J. T. Lab 67

C. F. 74.]

Routine Notes.

13/43

permanent

4249

[To be used only for notes, requisitions, etc., not intended for permanent record.]

that Dr. Geyar's connection with the work
 has ceased for the close year 1942-43
 and that the manufacture has since then
 been taken up at the J. T. L., the work being
 attended to by Mr. Rangaswami who was
 associated with Dr. Geyar for the current
 & an allowance of Rs 257. P. m. has been
 recommended to the chemist.

4) The present proposals of the J. T. L. will
 raise the following important issues which will
 have to be got clarified & settled before
 the question of the grant of allowance is
 considered.

(1) Whether the services of Dr. Geyar
 are not at all necessary during the
 current year 43-44 onwards whether
 J. T. L. can go on with the work
 independently without any trouble in
 the working of the process of Dr. Geyar.

(2) The scheme has been projected & worked
 out by Dr. Geyar for which he says he
 has a patent. In view of this whether
 the J. T. L. can ^{continue to} utilize the process

without a guarantee without the services of Dr. V. Geyar during
 the current year 43-44 onwards.
 A without a guarantee from him to avoid eventual legal trouble

5) A reference to the patent rights appears to
 have been raised by Dr. V. Geyar. The file
 may therefore be sent to the Patent Section of
 the S. M. Branch to put up that file also.

6) There

is a further letter today from C. D. G. C.
 Please put up

Routine Notes.

[To be used only for notes, requisitions, etc., not intended for permanent record.]

Letter No. 8.633. Dated 15-4-44, from Mr. G. S. C. forwarding report on the working of the scheme for the manufacture of Creamy Lactic Acid. It is stated that the scheme could be worked satisfactorily during the last year following full equipment required for the purpose and that about 1550 lbs of Creamy Lactic Acid could be produced daily. It is also stated that Dr. A. V. Narendranagar's business in this work ceased after the year 1942-43 and that he did not work for the whole period as he did not have proper equipment at the Lohacherry. It is also stated that Dr. Narendranagar's employment was independent. Expert for this work is not conclusive to the Lohacherry Lactic Acid Scheme & the discipline of the Lohacherry Lactic Acid Scheme. It is proposed to hand over the Lohacherry Lactic Acid Scheme to the Government during the current year. The yield of Creamy Lactic Acid from which is expected to be between 1500 lbs to 1750 lbs per day. The cost of production per lb. is estimated to be between Rs 6-5-0 to Rs 7-1-0. The estimated expenditure is about Rs 11,100.

72 / 716

JTL

9) It is also stated that the work re: this production is being attended to by a Chemist - who is a regular establishment of W.D. T.L. (perhaps Mr. Range Swade)

10) Your son has definitely stated that Mr. Naradanga's services are not at all necessary to carry on the production of the cream of tartar at W.D. T.L. Further he has not mentioned anything about the patent which Mr. Naradanga is supposed to have in respect of this manufacture.

11) Held for perusal and consideration. The Chemist who is attending to the work connected with the manufacture of cream of tartar is recommended by the Govt. The Solicitor General has in his letter of 11/4/44. No. D. 289.30.33 / etc. 289.42.2

12) Please obtain for the E.P. Branch the necessary patent question.

13) Please obtain for the E.P. Branch the necessary patent question.

14) E.M. Br. may kindly put up the concerned file.

15) The file re: the patent question is put up.

It may kindly be returned as soon as possible. Subd.

20 The Proposal given by Govt. Dir. I.C. 4/44 re: the continuance of the Semi Commercial type of Cream of Tartar at I.T.C. is for Pansal. It has been accepted that there is a potential demand for this Chemical. Moreover it is reported that this is an essential ingredient for the use of Pharmaceutical Preparations, which the I.T.C. is now manufacturing & that it is difficult to get this product in the market.

23 While considering the Proposal of the Govt. Dir. I.C., the following facts ^{are} ~~will have to be borne in mind~~ as they are indicated below in brief—

24 Dr. V. S. Sengupta has been representing both to the Board of Scientific & Ind. Res.

that
 to Galt, the remuneration due to him
 during 1962-63 has not yet been paid
 that he was dissociated from the
 work of the project back after that
 Galt's disassociation with the project
 is continuing to continue the process project
 worked out by him, without utilizing his
 services or suitably compensating him for
 utilizing the process for which he says he
 has a patent, read in good nature
 the process for order of the

Flag C - draft
 file

Pr 7

(1) Remuneration of Dr. V. during 1962-63
 Settlement at 5.2 at 10.10.63
 (2) Continuation of work at J.T.L. during
 1963-64, which is the service of Dr. V.

2c

(3) Payment of allowance to Dr. V. for
 goods, chemicals, charges of work

Flag A - draft
 file

(4) Whether the J.T.L. can utilize the
 process project worked out by Dr.
 without suitably compensating him

2b

(1) Remuneration of Dr. V. during 1962-63

Dr. V. who is employed as the director of the project

during the period without compensation may

be paid in the amount of Rs. 100/- per month

per year. This is as per the recommendation

of the Galt Committee which says that Dr. V.

was already receiving Rs. 100/- per month for the order

Dr. V. is entitled to the remuneration of

Rs. 100/- per month for the complete year 1962-63

and the amount of Rs. 100/- per month

is not to be paid to Dr. V. for the year 1962-63

The G. D. has reported that his services
ceased after the close of the year 1942-3.
The G. D. also reports that Dr. V. had
not worked for the whole period, while
Dr. V. says that he worked during the
entire period (being in charge of the work
from Nov 41 up to the date given below
the G. D. which was used by him in
July 42). It is true that Dr. V. had
worked during the latter part 1941-42
but the remuneration was ~~not~~ ^{not}
for this period. It is therefore not
clear why the G. D. has not arranged
for the full financial settlement of Dr.
V. especially when the services of
Dr. V. are not reported during the current
year. Dr. V. wants a clear interpretation
of his order dated 28/1/43 & final
settlement of his account.

(2) Contributions given with Dr. V. & utilization of the funds

It will be seen from the letter from
the G. D. of 4/4/43 that the work is
going on since Nov 1942. In this
connection, the G. D. has definitely
reported that the services of Dr. V.
are not reported during the current year.
But Dr. V. has raised the 28. file
letter - that it is not correct for
the G. D. to continue ^{his} ~~the~~ ^{for}

Continuation Sheet.

of 43

Page.
4560

for which he says she has a patent,
without having been suitable confirmation
especially when she has been asked by
Dr. Dyer to ~~associate~~^{limited form} with the work.
This question is separately worked up at
by Dr. Dyer in Br. 10 & 11 & 12 & 13
has no further upon the subject of the
question of her present proposals.
Neither has he sought specific orders of fact
for the continuance of the work^{Dumy 43-64}, but has
reported to the action taken by him
in this regard for the future of Guit.
(3) All aspects to Rep. Ruyt fud da
Since the article has been accepted by the
Chemical (with all the guidance of the report)
for 1.7.43, the allowance of Rs 125/-
recommender by the Gait Dr. may
perhaps be made, given the financial
circumstances. This allowance was proposed to be
~~not~~ debited to the Manufacturing of J. Tinschman,
"29" Subh for order.

Dr. 30) Dr. Dyer has been associated
9/3/44 with the manufacture of terephthalic acid
of Tactant & ~~terephthalic acid~~ in the 12th.
10/3 Since 1941 preliminary work was done
under his technical guidance in the 12th
prior to 1942-43 (see Dr's letter dated 12.9.42)
The actual commencement of the work

2574

depended on the ~~required~~ equipment
 required being ready & the funds
 being available. The latter could only be
 seasonal & the ~~work~~ regular manufacture
 seems to have recommenced from October '42,
 as reported by the Govt Dir. Dr. Deyangar has
 not been given any remuneration for the work ^{done}
 him prior to 1942-43 & his connection with the work
 has been severed. ~~on employment~~ The ~~discontinued~~ V & S
 the arrangement in the "seasonal" years 1942-43
 for a definite period.
 it appears from the
 the period of one of
 31/1/43 Regar
 continued the process. Govt Dir may be again
 consulted in his definite view regarding the
 claims of Dr. Deyangar that he is a specialist in
 the process. Reference is made to the letter of 16/9/41
 for the Secy, Bd of ~~Dr. Deyangar~~ Dr. Deyangar & the letter
 reply dated 26/9/41 of ~~Dr. Deyangar~~ 'H. & N' in the
 linked. D.P. File No. 88/41. It is seen that Dr. Deyangar
 has a patent assigned by the Govt of India.
 But he does not seem to have taken out a patent
 in the State. This question may be decided in
 consultation with the Govt Dir & the Dir of (Controller
 of Patents & Designs).
 The Govt Dir recommends an allowance

1049
29

17/3

OFFICE OF THE MINISTER
FOR INDUSTRIES & SUPPLIES
MAR 20 1944
No. 5591

of Rs 25/- per to Mr. Rangegowda, chemist of the
D.T. who is engaged on this work & doing it inde-
pendently now. He is getting Rs 60/- per now.
It is stated that the allowance would be ~~added~~ ^{deleted}
(as in the case of pay) to the manufacturing account
of the material. This is for orders.

(as in the case of Dev Seey) To 14.3.44

33) The proposal of Dr. Vasoderaji Lyngar is
unimpaired and his patent rights need not be
mixed up with the present proposal. They may be
dealt with separately.

34) The present proposal is to grant an allowance
of Rs 25/- per to Mr. N. Rang. Gowda who has been
in charge of the work from 1.7.43, when Dr. V's
connection with it terminated. Mr. Rang. Gowda's
pay is Rs 60/- per. The Director says his salary is
debited to the manufacturing account of Cream of
Tartar and the allowance, if granted, will be
similarly debited. The proposal may be sanctioned.

(Mr. J. S. S.
H. S.)

FROM

E. V. GANAPATI IYER, Esq., B.Sc.,
Government Director, Industrial Concerns,
BANGALORE.

To

Charles E. Noronha, Esq., M.A.,
Secretary to Government,
Development Department,
Bangalore.

Sir,

Flags 'V & S'
present
I have the honour to state that Mr. H. Range Gowda, B.Sc., who was a chemist in the Government Soap Factory, was transferred to the Industrial & Testing Laboratory on 30-10-1942 and associated with Dr. A.V. Varadarajaiyengar (who was engaged on an honorarium of Rs.100/- a month for one season) in connection with the scheme for the manufacture of Cream of Tartar from raw Tamarind. Dr. A. V. Varadarajaiyengar's connection with this work has ceased from the close of the year 1942-43 and since then, Mr. Range Gowda has taken over the manufacture of Cream of Tartar directly and the General Manager reports that he is doing the work satisfactorily. The manufacturing processes require great care and special attention in the several stages and have involved the fabrication and operation of new equipment and plant. A considerable amount of supervision has also been exercised over the labour and other staff employed on this manufacture. Considering the heavy nature of the work and the special responsibility and care involved in establishing this new and important line of production at the Laboratory, the General Manager recommends that Mr. Range Gowda be granted an allowance of Rs.25/- a month for the work, in addition to his pay of Rs.60/- with effect from the date of his being put in charge of this work and so long as he is employed on it. I agree with the General Manager's recommendation and request you to kindly obtain the sanction of Government to the payment of the allowance from 1-7-1943.

A
As Mr. Rangegowda's salary is debited to the manufacturing account of Cream of Tartar itself, the allowance will also be similarly met, and the expenditure will not therefore increase the normal revenue expenditure of the concern.

Early orders of Government may kindly be intimated.

I have the honour to be
Sir,

Your most obedient servant,

E. V. Ganapathi Iyer
Government Director,
Industrial Concerns.

KVS.

Dated 3rd January, 1944.

FROM HC

E. V. GANAPATI IYER, Esq., B.Sc.,
Government Director, Industrial Concerns,
BANGALORE.

To

mr
HN + mr
HSD

The Secretary to Government,
Development Department,
Bangalore.

Sir, Sub: Manufacture of Cream of Tartar at the Industrial & Testing Laboratory.

I have the honour to invite kind reference to Government Order Nos.D.3930-33/I&C 287-42-2 dated 12th December 1942 and No.D.4786-89/I&C 289-42-4 dated 28th January 1943 respectively sanctioning a scheme for the manufacture of Cream of Tartar at the Government Industrial & Testing Laboratory and to state as under.

The scheme envisaged the handling of 500 tons of green tamarind during the season between October 1942 and May 1943 under the supervision of Dr.A.V.Varadaraja Iyengar, Bio-Chemist for conversion into cream of Tartar for which there was demand. This quantity of tamarind could not be secured as the Forest Department from which this supply of 500 tons was expected could supply only about 34½ tons. At the last moment supplies were arranged from private people and a total quantity of 117 tons only could be secured in time. There was delay in the fabrication of equipment required like gun metal crusher, screw presses, etc. A gun metal filter press costing Rs.4,000/- required for conversion of calcium tartarate into cream of tartar for which orders were placed with a reputed local firm viz., Messrs. P.M.Madurai Mudaliar & Sons in November 1942 was supplied only in the later part of October 1943. Dr.A.V.Varadaraja Iyengar's services on this work ceased after the close of the year 1942-43 on the expiry of the period of sanction of the scheme. He did not work for the whole period as he stated that he could not make use of any other available equipment of the Laboratory. His employment as an independent Expert for this work is not conducive to the satisfactory maintenance of the discipline of the Laboratory or the economy of the manufacture and as his employment during the last season was without commitment it is not proposed to requisition his services during the current year for this work.

The work commenced on 30th October 1942 and by the middle of April 1943, the first stage of the process viz., extraction of juice by crushing tamarind employing manual labour and conversion thereof into calcium tartarate an intermediate process was completed. 3,154 lbs. of Tartarate were got therefrom.

This tartarate could not be converted quickly into Cream of Tartar for want of a filter press; whereas 150 lbs. of Tartarate can be handled in a filter press at a time as is being done since 10th November 1943 only 10 lbs. could be taken up previously. On account of this slow process only 1,546 lbs. of Tartarate could be taken up for conversion into Cream of Tartar till 30th November 1943 resulting in a production of 744 lbs. of Cream of Tartar. As

As stated above this processing is now being done in the newly installed filter press and the balance of 1,608 lbs. will be completed before the end of February 1944.

The General Manager reports that by processing in the filter press, in addition to quick handling thereby resulting in saving of labour cost, the production is also greater. By the results achieved so far, it would appear that as there is less of wastage, whereas between 40 to 45% was the cream of tartar produced for 100 lbs. of Tartarate, the production now is about 50 per cent.

A total quantity of about 1,550 lbs. of Cream of Tartar is expected to be got from the 117½ tons of green tamarind handled last year. Except for 198 lbs. used in the Laboratory for the preparation of pulvis jalap co, the balance of 744 lbs. manufactured so far is on hand.

An estimate of the financial result of this production taking the actuals to end of November 1943 and taking into account the selling rate of this product which is fixed at ~~Rs. 7-5-0~~ a pound for whole sale and Rs. 7-14-0 a pound for retail sale under the Drugs Control order recently promulgated by the Government of India is given below:

1. Cost of 117½ tons of tamarind...	Rs. 4,257	0	0
2. Chemicals and other stores...	2,640	0	0
3. Labour: exclusive of Dr. A. V. Varadaraja Iyengar's honorarium of Rs. 980/- which has to be capitalised.	4,000	0	0
4. Cost of Steam and power and Water.	355	0	0

Total	Rs. 11,252	0	0

Resultant product is 1,550 lbs. of Cream of Tartar.
Costing Rs. 7-4-0 a lb.

As already stated the cost of production would have been very much less if a gun metal crusher had been got in time and used for crushing tamarind for extracting the juice instead of utilising manual labour as for example against 100 to 120 men employed in the last season for this operation, ~~the number employed in the last season for this operation~~, the number employed now for the crushing the same (if not more) quantity of tamarind is only 20. Want of a proper Filter Press was also an additional handicap. But for the Drugs Control Order the production in spite of these handicaps would have brought in good profits. There has been one good result. This new undertaking has given a good idea of the prospects of the scheme and with a view to decide whether the manufacture may be taken up permanently, the work is continued during ~~this~~ year also and the results will be watched.

It is proposed to handle 100 tons of tamarind only during the current year, the yield from which is expected to be between 1,500 lbs. to 1,750 lbs. (the yield) depending upon the tartaric acid content of raw tamarind received. The production cost per lb. will be between Rs. 6-5-0 to Rs. 7-0-0. The estimate expenditure as per statement enclosed is Rs. 1,000/-. In it provision of Rs. 1,300/- has been made towards interest and depreciation and Rs. 700/- towards over-head. There is appreciable savings under labour cost ~~as we have~~ now got all the equipment required, viz., the gun metal crusher and the filter press. Against an expenditure of Rs. 4,000/- under "Labour" incurred last time for handling 117½ tons, the provision made for handling 100 tons is only Rs. 1,400/-. The average cost per ton of tamarind last year was Rs. 37-8-0 and it is now nearly Rs. 46/-. The cost of chemicals etc. and fuel required for Steam have also increased. In spite of the savings of about Rs. 2,600/- under labour as compared to last year, the cost of production has not gone down appreciably as we have to pay more for raw materials and steam power.

In this connection, I may state for the information of Government that Cream of Tartar is an essential ingredient of some pharmaceutical preparations manufactured by this laboratory and a part of this chemical manufactured will come in very handy for our standard production; particularly now when it is difficult to get this material in the market. The production commenced from 20th November 1943 and is being attended to by a Chemist who is on the regular establishment of the Industrial and Testing Laboratory.

I have the honour to be,
Sir,
Your most obedient servant,

W. L. Anapali
Government Director,
Industrial Concerns.
